Experience

Global Study UK

Aug 2024 - Aug 2025

Web Developer

Designing and building responsive, user-friendly front-end websites using WordPress and Elementor, with extensive custom CSS and JavaScript coding. Focused on creating sleek, modern designs with a mobile-first approach, ensuring seamless performance across all devices. Optimising functionality and user experience through clean, efficient code while aligning with brand identities and business goals.

Skills Bootcamp in Front-End Web Development

Dec 2022 - Mar 2023

Front-End Web Developer

Intense online course to learn hard and soft front-end fundamental concepts of web design and development, including Figma, HTML, CSS, JavaScript, Git, and Github.

Ewelina Studio

2021 - now

Designer and Artist

Create a variety of fine art realistic pieces including paintings and sketches.

Handle multiple art projects focusing on requirements from start to finish.

Teach painting for individuals and groups, and help them discover their creativity – at the studio, online or at company offices.

Gensler, London, UK

May 2015 - Oct 2021

Architect

Prepare and present feasibility reports and design proposals to the client.

Consult with other professionals the project design objectives, requirements and budget.

Produce detailed workings, drawings and specifications.

Assess the needs of the building and its users, advising the client on the practicality of their project.

Use computer-aided design software.

Negotiate with contractors and other professionals.

Control a project from start to finish.

Carry out regular site visits to check on progress and ensure that the project is running on time and to budget. Resolve problems and issues that arise during construction.

Ensure that the environmental impact of the project is managed.
